

Alan Kelly - Product Designer | UX Design | Enterprise Digital Products

Antrim, Northern Ireland | uxalan.com | [LinkedIn](#) | alankelly@gmail.com | +44 (0) 75 988 752 28

Profile

UX Designer with 5+ years' experience designing user-centred digital products and services across enterprise platforms, complex business systems and emerging products. Experienced in taking ideas from discovery and problem definition through research, prototyping, usability testing and delivery.

AI-first in my design practice, using tools such as ChatGPT Codex, Claude and Microsoft Copilot to accelerate research synthesis, ideation, prototyping and iteration while retaining strong user-centred judgement. Comfortable working closely with engineers to understand API behaviour, technical feasibility, performance considerations and delivery constraints.

Strong communicator and facilitator, confident presenting concepts, research findings and design rationale to stakeholders. Experienced in collaborative workshops, accessibility-led design, design systems and Agile multidisciplinary teams.

Core Skills

User-centred design | UX and product strategy | AI-assisted prototyping | Service design | User research | Customer and stakeholder interviews | Usability and concept testing | Journey mapping | User flows | Information architecture | Wireframing and high-fidelity prototyping | Workshop facilitation | Accessibility and WCAG 2.2 | Design systems | Stakeholder storytelling | Agile delivery | Design reviews and mentoring

Professional Experience

User Experience Specialist - A&O Shearman Jan 2023 - Jan 2026

Designed and delivered user-centred experiences across internal and client-facing digital products within a large international organisation.

- Led UX activities from discovery and problem definition through research, prototyping, usability testing and delivery.
- Conducted stakeholder interviews, workshops and usability testing to identify user needs, validate concepts and inform design direction.
- Created journey maps, user flows, service artefacts and information architectures to clarify complex problems and identify opportunities for improvement.
- Developed wireframes and high-fidelity prototypes to make concepts tangible and help stakeholders make informed decisions quickly.
- Facilitated ideation and collaborative design activities with business, product and technical stakeholders.
- Presented research findings, design rationale and recommendations, balancing user needs with business objectives and technical constraints.

- Collaborated closely with product managers and developers throughout Agile delivery, supporting technically feasible solutions and effective handover.
- Applied accessibility and inclusive-design principles throughout the design lifecycle, including WCAG standards.
- Contributed to design systems and reusable components to improve consistency and efficiency across products.
- Supported colleagues through design reviews, feedback, knowledge sharing and UX best-practice guidance.

Developer - Legal Technology, A&O Shearman Apr 2022 - Jan 2023

Hybrid UX and development role delivering internal digital products.

- Built responsive interfaces and dashboards using HTML, CSS and JavaScript.
- Developed internal solutions using Microsoft Power Platform.
- Worked with designers, developers and stakeholders to translate business requirements into usable, technically feasible experiences.
- Gained practical insight into how architecture, implementation constraints and technical trade-offs influence interaction design.
- Contributed to Agile delivery across multidisciplinary teams.

Attosell - Card Selling Platform - Co-founder, Product and UX Design | 2026 | attosell.com

Co-created a live digital product designed to reduce the time and manual effort involved in identifying, pricing and listing trading cards for sale.

- Identified user pain points and mapped the seller workflow to define the core Scan → List → Sell journey.
- Used seller feedback and domain research to inform product priorities and UX decisions.
- Rapidly prototyped and iterated workflows for scanning, pricing, inventory management and exporting listings.
- Worked closely with development to balance user needs with API behaviour, technical feasibility and performance.
- Used AI-assisted prototyping to move rapidly from ideas to functioning interfaces for evaluation.
- Continued improving the live product based on user feedback and real-world usage.

Tools And Technology

Design: Figma, FigJam, Axure, Balsamiq

Front end: HTML, CSS, JavaScript, React

Platforms: Microsoft Power Platform, SharePoint, Sitecore, WordPress, Kentico

AI: ChatGPT Codex, Claude, Microsoft Copilot, Figma AI

Education

Professional Diploma in UX Design - UX Design Institute

BSc (Hons) Multimedia Computer Games, 2:1 - Ulster University
